EXPERIENCE –

Datadog • Senior Product Designer | Apr '18 - Aug '22

Trusted in leading design efforts for several high-touch products including Onboarding, Billing, Team & User Management, Integrations, Marketplace, and Developer Platform. General responsibilities included product and feature concept/ideation, wireframes, prototypes, user research and testing, iteration by analyzing user feedback, and collaboration with project managers and engineers to ship products to market within timelines.

Additional responsibilities include participating in growing the team through hiring efforts, mentorship to new designers, contributing new design patterns for the Design System, collaborating with other designers to cross-integrate products, and much more.

ASCAP • *Digital Product Designer | Aug '17 - Mar '18*

Focused on improving current user experience for multiple digital touch points while standardizing our brands visual design. I lead our team's design efforts in redesigning the member onboarding experience and user interface, which is calculated to save the company at least $1 million annually. Ongoing projects include building a design system for our team, which includes style guide and reusable responsive components.

Code & Craft • *Product Designer & Front-End Developer | Aug '16 - May '17*

Focused on designing, building and launching mobile responsive web applications for clients by utilizing Agile methodologies through rapid prototyping and iterating on user feedback.

Squarespace • *Design & Development Specialist | Sept '13 - Aug '16*

Design and Development Specialist in Customer Operations focusing on building internal tools and external microsites. Additional responsibilities include assisting Squarespace Developer Platform users with developer-specific and template design-specific needs.
